inliten[™]

Innovative exhibit system designed for impact and value!

Inliten is the innovative exhibit system that has been designed to give you the most dynamic and flexible exhibit possible. Bring your marketing message and corporate image into a new dimension with the exhibit system that will impact your audience, not your budget!

imagine that.SM

Dynamic new look with modular versatility and savings

Sturdy and structural

The Inliten exhibit system was engineered to give you a structural, versatile, and affordable exhibit. Its sturdy steel framework supports shelving and counters for displaying product, yet it has an efficient footprint which maximises your graphic opportunity.

Easy to set up

Inliten sets up with a simple Allen key so you save on installation and dismantle costs. Fabric graphic panels are lightweight and attach quickly and easily.

A perfect rental exhibit

With its superior merchandising capabilities, Inliten is perfect as a rental exhibit. It has a variety of repositionable accessories that allow you to load it up with product or give multi-media presentations. And, because of its unique design, you don't have to look like your competition – or any one else.

Easy to reconfigure and expand as you grow

Inliten is universal, so you're not stuck using the same inflexible exhibit. Use a portion of your 6m backwall to create a 3m exhibit. Add components to create a larger exhibit or to update your look without investing in a new exhibit. That saves you money.

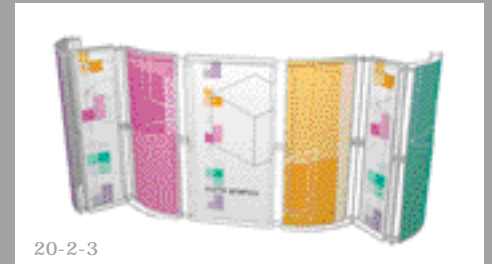

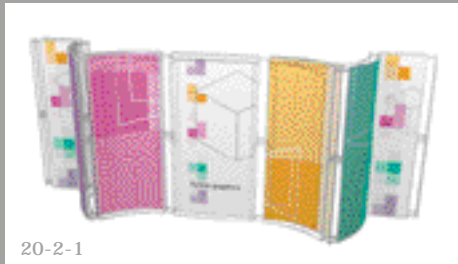

Inliten models

The Inliten system consists of three different, but universal sections – 600mm and 1200mm linear and curved. Inliten sections can be used in a variety of combinations to create many looks.

An exhibit system for many needs!

With its sturdy framework and variety of accessories, Inliten is perfect for displaying your products – from computers to apparel. Inliten also gives your marketing message real interest and depth with layered graphics. Each Inliten section can host multiple layers of fabrics and opaque or translucent graphics. Inliten is the exhibit system that is sure to fit your exhibiting needs with a look that fits your company.

Sheer fabric

Graphics printed on sheer fabric are semi-transparent which works with the background fabric to create a dynamic visual effect.

Monitor support

Inliten's monitor brackets support a variety of media screens and are repositionable.

Workstation

Sturdy workstations come with a black granite finish and are repositionable between sections. Available with or without support leg.

Fabric graphics

Lightweight, yet durable, fabric graphics attach easily and are held taut for a crisp, clean look.

Sintra® graphic panels

Opaque Sintra panels suspended with cable put your graphics front and center. Panels can be profile-cut to any shape.

Header graphics

Single, seamless header panel attaches with magnet and can be profile-cut to attract even more attention.

Clear graphic panels

Opaque and translucent graphics on clear polycarbonate add interest and dimension to your graphic message.

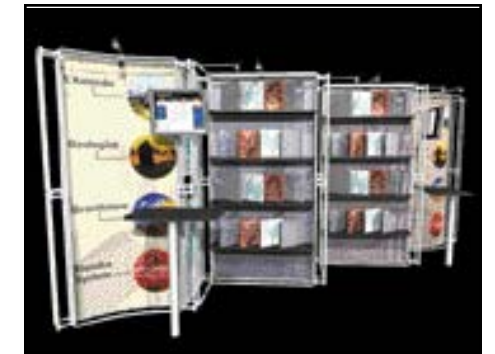

Shelving

Shelves are repositionable and come with black granite finish. Each shelf holds up to 15 kgs (40 kgs. per section max.)

Stabilisers

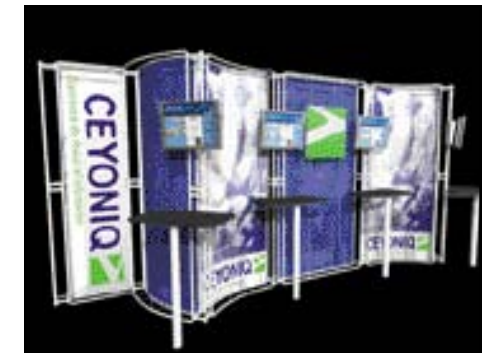

Stabilisers add support to certain configurations which allows you to load up your exhibit with product.

Inliten is great for:

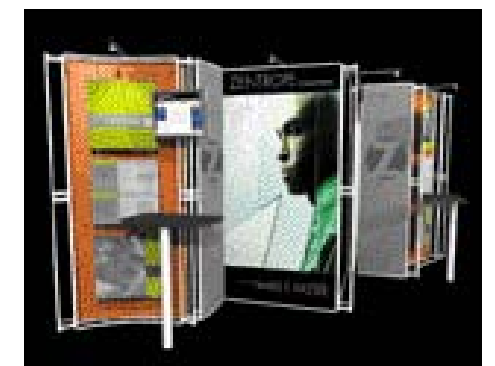

Merchandising

Display your products in style! Inliten not only looks great, but has the accessories – and strength – to handle an abundance of product.

Presentations/demonstrations

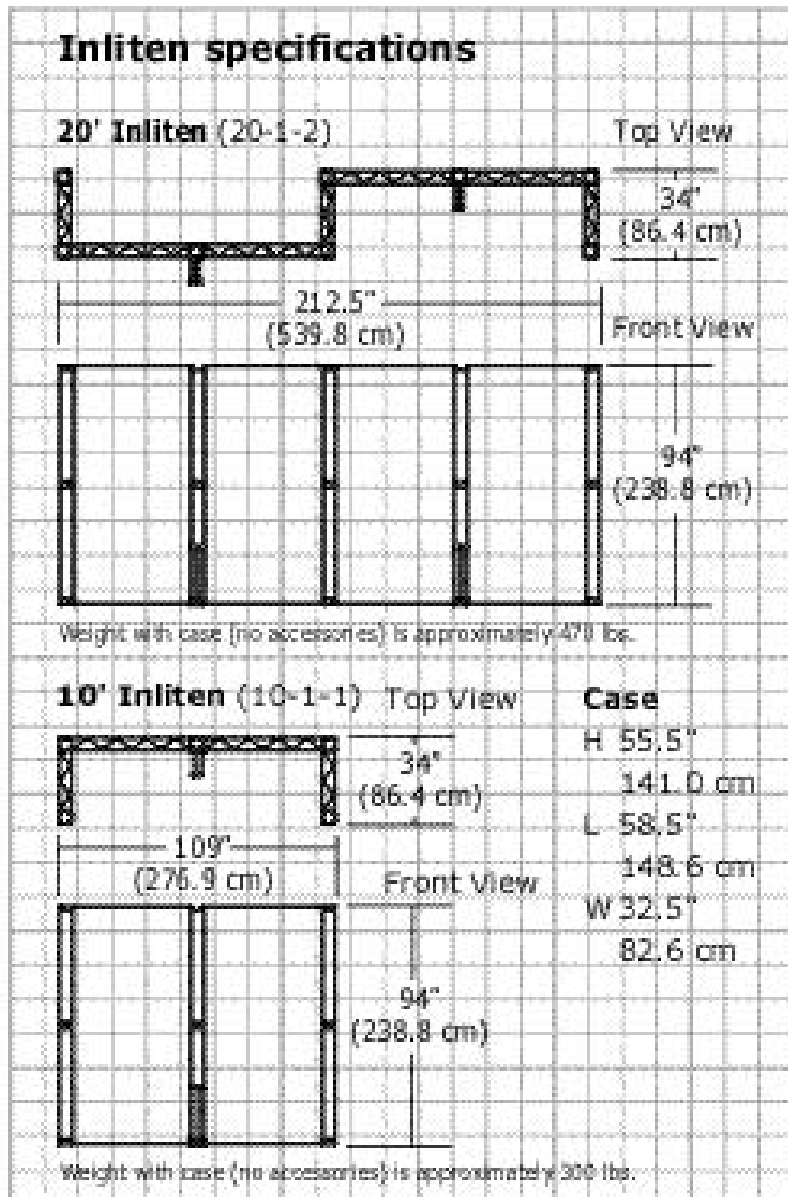

A perfect vehicle for interactive exhibiting! Our media support systems allow you to show off your latest video, products or website.

Graphic impact

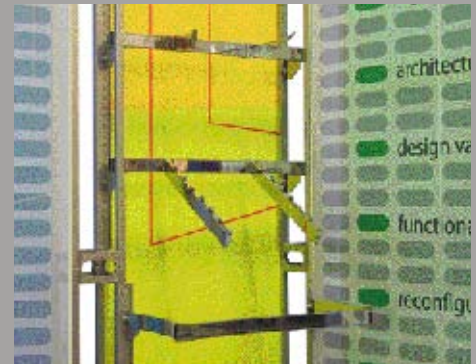

Attract attention with colour and image! Large seamless graphics communicate your marketing message and position your company.

Inliten has functional and stylish accessories that enhance your exhibiting efforts.

Halogen Spotlights

Elegant halogen spotlights bring attention to your products and marketing message. Telescoping arms allow you to position lights to best fit your needs.

Apparel Rack and Peg Bar

Inliten has a variety of accessories that are perfect for merchandising – like racking and waterfall brackets for apparel and peg bars for packaged products.

Inliten Case

Most 6m Inliten backwalls – depending on the amount of accessories – fit neatly into one heavy-duty case. The Inliten case has wheels for easy transport.
