## Combining strength, versatility and design

SkyTruss' sturdy metal framing allows you to build to great heights and achieve the feeling of mass with a relatively small footprint. You can build your exhibit above the show floor with towers and bridges – leaving your exhibit space open for business. SkyTruss is completely modular and comes in straight and curved sections in a variety of sizes which provides unlimited design possibilities.

imagine that.<sup>SM</sup>

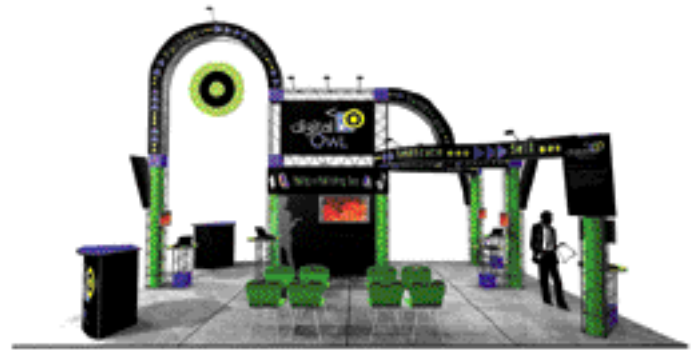

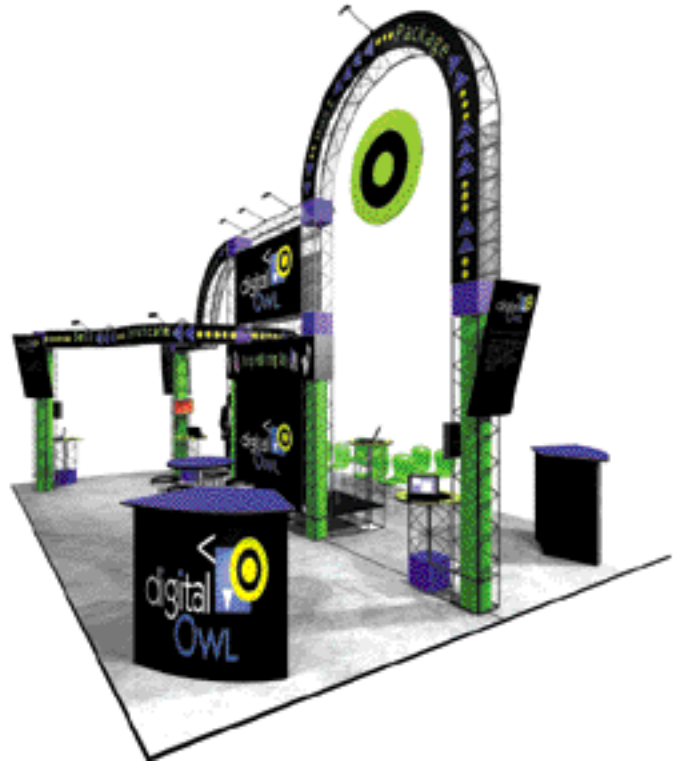

# Get an exciting custom look – and save money

## Many sturdy components

SkyTruss' sections come in a variety of sizes and curves which gives you the ability to create any look imaginable. And SkyTruss is sturdy so you can mount monitors for presentations and shelving for displaying product.

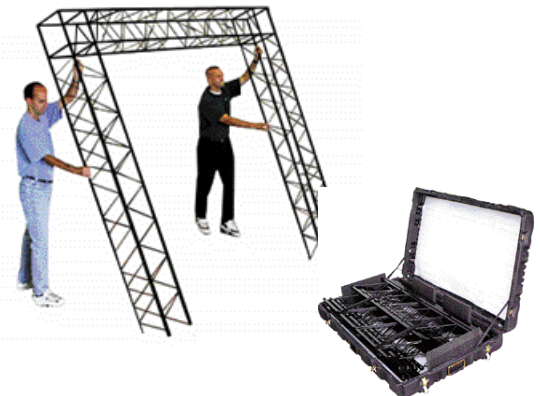

## Great for graphics!

Fabric graphics mounted to SkyTruss gives you amazing impact and value. They're durable, lightweight, and can be produced at any size – from small to massive. Our special mounting clips keep your graphics taut and looking their best. And, because SkyTruss was designed with flat surfaces, you can magnet-attach a variety of graphics and panels that are easy to apply, update and change.

# SkyTruss folds down to save money

SkyTruss sections fold down to save on shipping and storage costs. Even curved sections pack flat. You can fit up to ten metres of straight SkyTruss into one portable Skyline case. For larger exhibits, you can ship SkyTruss in crates, folded flat to take up less space.

# Reconfigures to fit your needs

Versatile SkyTruss reconfigures to fit your changing needs. Since our frame sections and connections are universal, you can change or update your look using your existing components. You can use portions of your exhibit for smaller shows or add to your exhibit as you grow.

SkyTruss graphics are easy to change so you can update your graphics as your marketing message evolves. Or you can make the most of your marketing dollars by having market-specific graphics that change from show to show to target particular audiences.

## SkyTruss works with other Skyline systems

SkyTruss is designed to be compatible with other Skyline exhibit systems. Add towers and hanging signs for impact. Add tables, kiosks, counters and even conference rooms for functionality. Whatever you need to make your exhibit efficient and effective, Skyline has it. Imagine that.

# Design solutions

Achieve the look that fits your organization. With its built-in versatility, graphic capabilities, and a host of functional accessories, SkyTruss allows you to create exhibits that are unique and effective.

Presentation area includes a stage and SkyTruss bench seating. Bridges incorporate downlighting.

9m backwall features large graphics, 3D logos and literature shelves mounted within SkyTruss towers. A variety of matching workstations add workspace.

A series of SkyTruss towers feature large fabric graphics and connecting bridges with magnet-applied panels. A hanging Skyline Fabric Structure adds impact.

Curved SkyTruss towers are covered with fabric. Mounted spotlights bathe the fabric with color. Structural workstations line either side of the exhibit providing workspace and secure storage.

SkyTruss with colourful graphics and Skyline ps3000 panels create a fun and festive exhibit.

Curved SkyTruss gives this unique exhibit a big presence and the opportunity to display product.

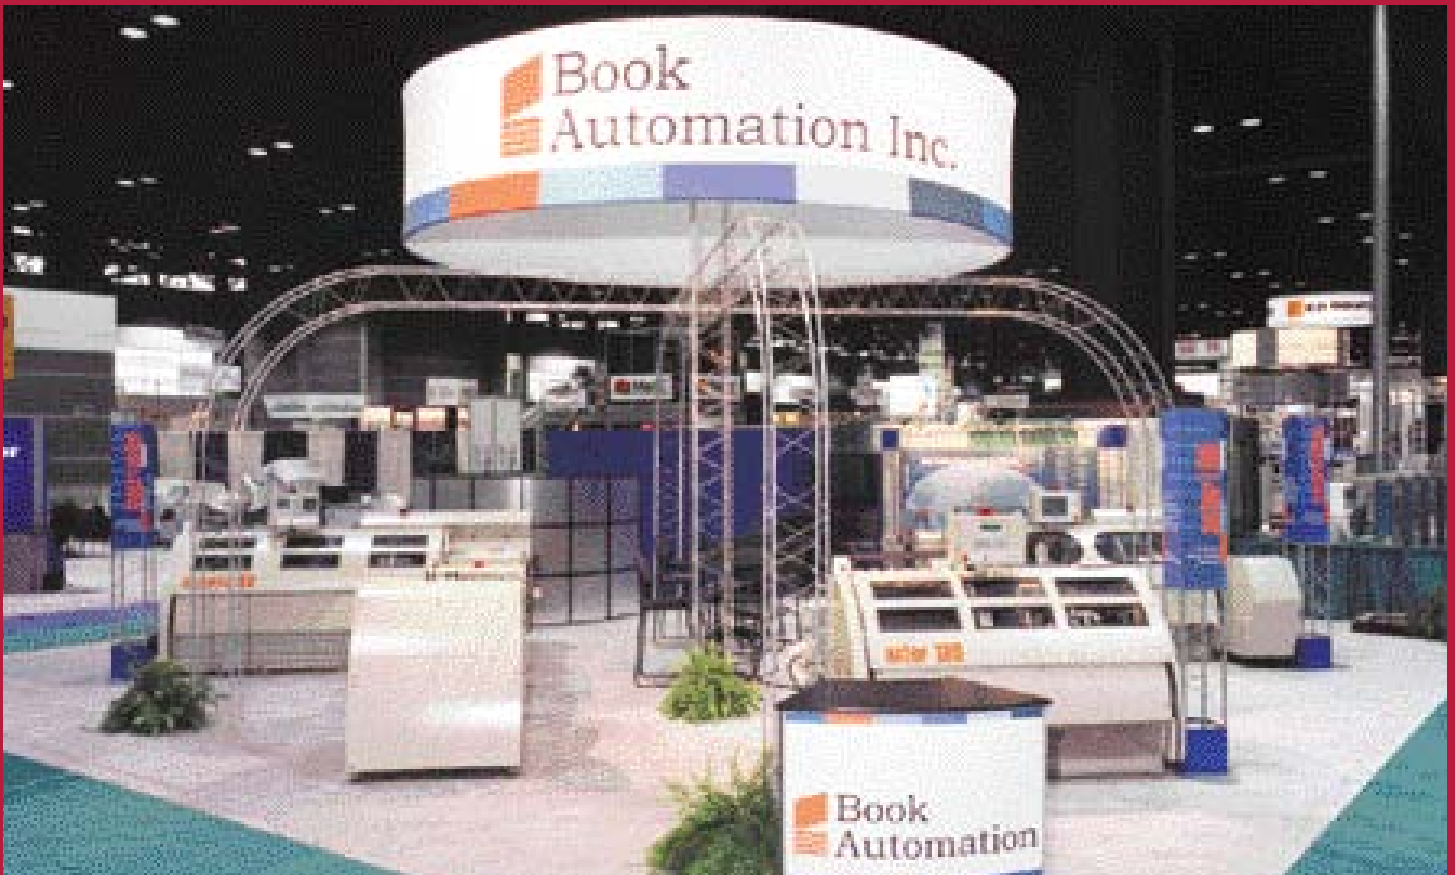

Backwall exhibit features a large backlit graphic, literature shelving, counters and graphic headers.

SkyTruss, in conjunction with Skyline ps3000 panel system, creates a great merchandising exhibit.

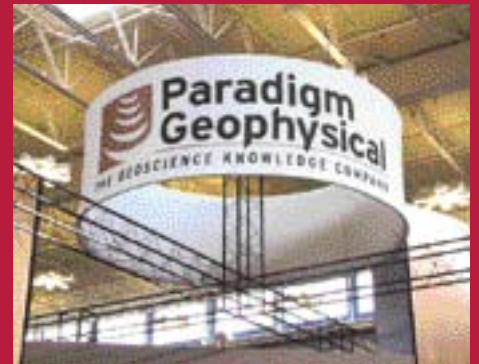

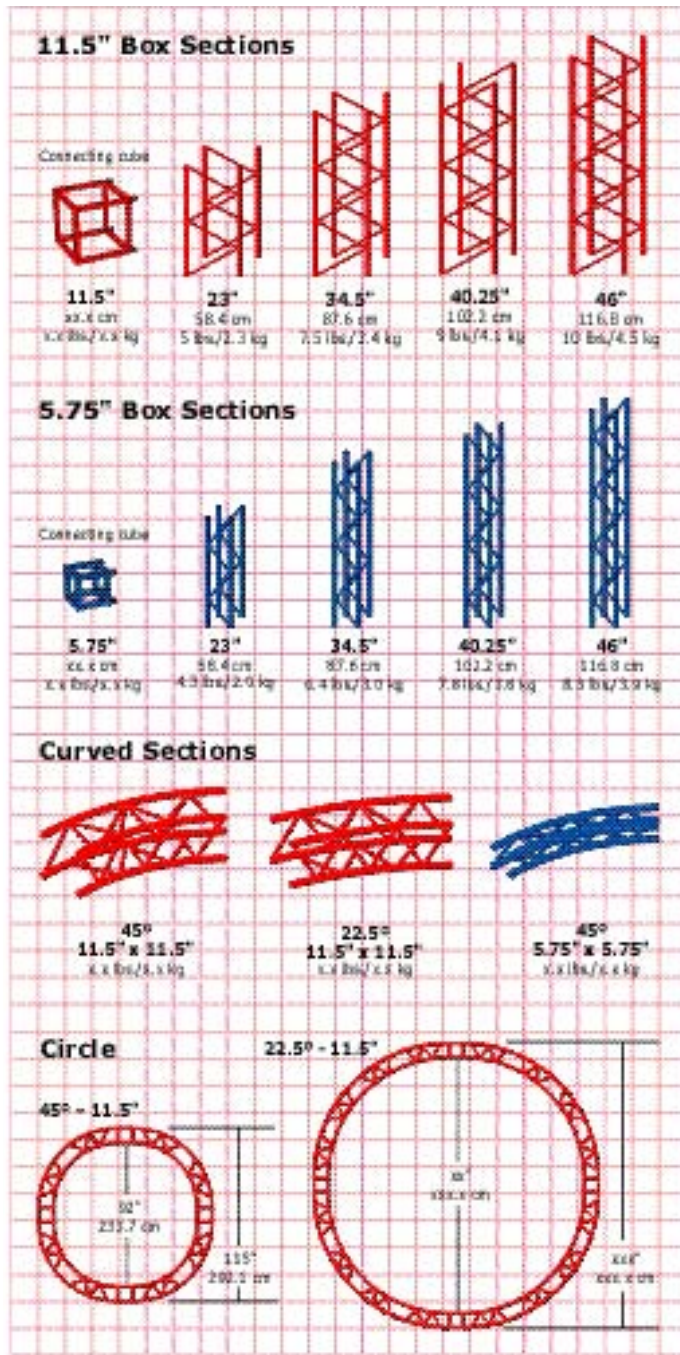

Colorful 4m tall fabric graphics command attention. A presentation screen is supported within SkyTruss towers over an enclosed kiosk which has clear panels for secure product display.

A large Skyline Fabric Structure mounted to a central SkyTruss tower gives this company a big presence without taking up valuable floor space – which is needed for displaying products. A conference room made up of frosted panels gives the opportunity to meet semi-privately with potential clients.

# skytruss®

SkyTruss has functional and stylish accessories that enhance your exhibiting efforts – from shelves and counters to lights and media support.

## Skyline Fabric Structures

Suspend Fabric Structures from SkyTruss towers for graphic impact and a bigger presence without the delay and costs associated with hanging structures from show hall ceilings.

## Monitor Platforms and Workstations

Hang monitor platforms throughout your exhibit to showcase your latest presentation, software, internet site, or video. Workstations come in a variety of heights, sizes and shapes.

## Packing Systems

Skyline has packing systems in a variety of sizes to match your needs and protect your exhibit. All systems have heavy duty wheels for easy transport.
